

“How To Build Green”

Training For Residential Builders & Remodelers

Introduction & Advanced:

Two Sessions in one day for the complete training!

Learn how you can enter the fastest growing Segment of the housing industry, while you save money and reduce your impact on the environment!

The Introductory Session: covers the basics of residential green building, how to meet the National Model Green Home Building Guidelines requirements for home certification, the use of durable and environmentally sustainable materials, the importance of indoor air quality and low impact development. Date: April 28, 2009 Time: 9 AM to noon. Cost: \$30

The Advanced Session expands on the details of the “how to” that builders need to actually build green. Topics include: An in-depth understanding of the house as a system approach to green building; understanding the thermal dynamics necessary to achieve the most effective and economical level of insulation; Control moisture and the durability of each component of the building envelope; Improving sustainability through proper selection of building materials and correct installation methods; How to achieve superior indoor air quality; and how to lower materials expenses while improving each area of the home. Date: April 28, 2009 Time: 1:00 PM to 4:30 PM. Cost: \$30

**Location: Greater Lansing Home Builders & Remodelers Association
